

Buses and Trucks

OVERSIZED VEHICLES CAN NAVIGATE ROUNDABOUTS SAFELY AND WITH EASE...

- 1 Have you ever heard of a "truck apron"? This feature allows for larger trailers to ride up a bit to ensure they can pass through the roundabout with ease.
- 2 Buses and other large passenger vehicles can use the striped median for extra turning room as they travel through the roundabout.

MOTORISTS GAIN EFFICIENCIES TOO!

- 3 Easy passing as the bus stops downstream of the roundabout.
- 4 No slow start for motorists after a red light... roundabouts keep traffic flowing for oversized vehicles.
