FY25 Supplemental Questionnaire

Applicant: [City of Centerville](#)

Project Title: [Yankee Street Resurfacing](#)

Application Summary:

Briefly describe the project:

The project takes place on Yankee Street between Winding Green Way and Spring Valley Pike. The project will include milling two inches of the existing surface and replacing it with new asphalt pavement. After repaving, new thermoplastic pavement marking will be applied to match the existing markings, with the addition of raised pavement reflectors. Base repairs will be made as needed to ensure a longer pavement life.

Yankee Street in this area is split between the jurisdictions of the City of Centerville and the Montgomery County Engineers Office. The portion of road from Winding Green Way to Silver Lake Drive belongs to the city and the portion from Silver Lake Drive to Spring Valley Pike is split between the City and the County. The Roadway is split 62% City and 38% County. The City will be the lead applicant and will manage the project since it is responsible for the majority of the work. The project costs and grant funding will be split based on the roadway split percentage listed above. If the project is awarded funding, a joint agreement will be executed with the Montgomery County Engineers Office to manage the grant and the project.

Other Factors

What other factors exist that make this project more important than other like projects?

This is a Joint application with the Montgomery County Engineers Office.
