**B: IDENTIFY THE PROBLEM (Describe the issue to be addressed) 2000 character limit.**

**There have been 10 breaks per 1000' on the water main that will be replaced. The main breaks cause a reliability issue due to outages. Breaks also require a boil notice to be implemented after service is back on line. This project will correct and replace any potential lead services within the area of the project.**

**C: PROJECT SCOPE (Describe the work to be completed) 2000 character limit.**

This project will replace 6" cast iron water main on Cedarlawn Dr in Harrison Township with 8" ductile iron water main with all appurtenances. The project will also remove old fire hydrants and replace them with new hydrants with closer spacing. The project seeks to replace the water main which has excessive breaks and has exceeded it's useful life. The pipes being replaced have broken at a rate of 10/1000'. The project will install 708 LF of 8" ductile Iron water main with 3 hydrant assemblies to replace 697' of 6" water mains with 2 fire hydrants constructed in the early 1950's. The proposed replacement will occur in the road right of way. There are 13 service connections in all. Cedarlawn will be milled and overlaid- 1321' X 26' wide.
